

# NORMAL SCHOOL NOTES

The Moorhead Normal school resumed work after the summer vacation with an attendance considerably greater than that at the corresponding time last year. The personnel of the school is of much satisfaction to those interested in the Normal school work. The present students are especially well instructed and are in advance in educational attainments. These facts indicate, no doubt, that the Normal is attracting students of ability and that the schools from which the students come are finer and more efficient than ever before. At present there are many High school graduates taking work to secure advanced diplomas, and others with elementary diplomas seeking the same end. This unusually large and capable group of students makes its influence apparent in all the work and social activities calling for talent and ability.

The newly organized kindergarten is one of the most interesting things in the Model school. The new department was busily at work Tuesday morning with about 30 children ranging in age from 4 to 6 years. Nothing could be more cheering than the assembly of little people who were beginning that morning the long road that modern education requires them to follow. Miss Osgood, with several assistants had everything arranged. The material equipment is par excellence; it is the best to be had. Mr. Henry Mueller takes the children back and forth from home and school, so they are in perfect safety from the moment they leave their doors till they return. Many visitors have called at the kindergarten, and all who are interested in this new school are invited to visit the kindergarten.
